2644

DATE MAILED: 10/04/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/885,169

Applicant(s)

CHARBIN-PRAMAYON,
BAPTISTINE

Examiner

Jefferey F Harold

Art Unit

2644

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 June 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,4 and 5 is/are rejected.
- 7) ☒ Claim(s) 3 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Information Disclosure Statement

1. The references listed in the Information Disclosure Statement submitted on June 21, 2001 have been considered by the examiner (see attached PTO-1449).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1, 2, 4, and 5** rejected under 35 U.S.C. 102(b) as being anticipated by Kawada et al. (United States Patent 5,638,439), hereinafter referenced as Kawada.

Regarding **claim 1**, Kawada discloses an adaptive filter and echo canceller. In addition Kawada discloses a method of detecting a frequency or a combination of frequencies in a signal by processing said signal by means of an appropriate algorithm, which method includes an operation of estimating filter coefficients for characterizing said signal using a least mean squares algorithm and an operation of computing a Euclidean distance between said signal to which said detection method is applied and at least said frequency or combination of frequencies to be detected using the filter coefficients obtained for the signal to which the detection method is applied by the estimation operation and the same number of corresponding particular filter coefficients that characterize the frequency or combination of frequencies to be detected, said frequency or combination of frequencies being considered as having been detected in

the signal to which the detection method is applied if the computed Euclidean distance is below a particular threshold value, as disclosed at column 3, line 16 through column 5, line 51 and exhibited in figures 2 and 3.

Regarding **claim 2**, Kawada discloses everything claimed as applied above (see claim 1), in addition Kawada discloses wherein the threshold value corresponds to a Euclidean distance between said signal to which said detection method is applied and a particular signal normally included in said signal to which said detection method is applied, the distance being computed using the filter coefficients obtained for said signal to which the detection method is applied by the estimation operation and the same number of corresponding predetermined filter coefficients that characterize the particular signal, as disclosed at column 3, line 16 through column 5, line 51 and exhibited in figures 2 and 3.

Regarding **claim 4**, Kawada discloses everything claimed as applied above (see claim 1), in addition Kawada discloses including computing at least one additional Euclidean distance between said signal to which said detection method is applied and another particular signal likely to be contained in said signal to which the detection method is applied to constitute on additional threshold value which is compared with the estimated Euclidean distance between said signal to which said detection method is applied and said frequency or combination of frequencies to be detected, as disclosed at column 3, line 16 through column 5, line 51 and exhibited in figures 2 and 3.

Regarding **claim 5**, it is interpreted and thus rejected for the reasons set forth above in the rejection of claims 1 and 2.

Allowable Subject Matter

3. **Claim 3** is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jefferey F Harold whose telephone number is 703-306-5836. The examiner can normally be reached on Monday - Friday 9 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Forester W Isen can be reached on 703-305-4386. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
